

Course Description:

1) Summary and Purpose

Louisiana will be the second state to partner with TEEEX to provide a Cybersecurity Training Portal on their website, in order to actively establish a cybersecurity training program. TEEEX will provide online Cybersecurity courses to the state through the training portal. The courses are designed to “ensure that the privacy, reliability, and integrity of the information systems that power the global economy remain intact.” With more and more state critical infrastructure powered by IT, it is becoming imperative that GOHSEP be able to offer Cybersecurity training to help professionals recognize and guard against cybersecurity related events. The Cybersecurity training portal in cooperation with TEEEX will be the first step to increasing Louisiana’s preparedness and training for any and all Cybersecurity incidents.

2) Target Audience

The target audiences for these trainings are Public and Private Sector: IT professionals, Business managers and professionals, Non-Technical computer users, and general IT users.

3) Benefits

- Increase Cybersecurity Awareness
- Professional Development
- CEU Credit
- Certified by the American Council on Education for recommended College Credit at the completion of each track
- No cost
